Jaypee Kosmos, Noida, Uttar Pradesh – 201304, India

## OBJECTIVE

Software Engineer with a B.Tech in Computer Science and hands-on experience in software development through a Product Developer internship at EOXS. Proficient in Java, Python, JavaScript, SQL, Data Structures Algorithms, Object-Oriented Programming, and database systems, with practical experience in developing, testing, debugging, and maintaining software applications. Seeking an entry-level Software Engineer / SDE role to apply strong problem-solving skills, build scalable and reliable software solutions, and contribute effectively to a high-performing engineering team.

## EDUCATION

- **United Institute Of Technology** September 2023 – June 2026  
*Bachelor of Technology in Computer Science and Engineering*  
◦ SGPA: 8.7/10 Prayagraj, India
- **Government Polytechnic Lucknow** July 2020 – July 2023  
*Diploma in Information Technology*  
◦ Grade: 77.2% Lucknow, India
- **Sachidanand Inter College** June 2020  
*Senior Secondary Education (12th)*  
◦ Grade: 76.6% Kushinagar, India
- **Sachidanand Inter College** June 2018  
*High School (10th)*  
◦ Grade: 84.8% Kushinagar, India

## EXPERIENCE

- **Product Developer Intern | EOXS** Sep 2025 – Feb 2026  
*Technologies: Odoo, Python, JavaScript, XML, PostgreSQL* Remote (Work From Home)
  - Developed and maintained software features within the Odoo ERP platform using Python, JavaScript, XML, and PostgreSQL.
  - Assisted in designing and implementing new product features based on functional and business requirements.
  - Collaborated with developers, consultants, and project managers throughout the software development lifecycle.
  - Performed software testing, debugging, and issue resolution to improve application functionality and reliability.
  - Worked with PostgreSQL databases and contributed to technical documentation and feature specifications.

## PROJECTS

- **HireFlow – Job Recruitment REST API** Live Demo  
*Tech Stack: Python, FastAPI, PostgreSQL, SQLAlchemy, JWT, Alembic, pytest, Docker, GitHub Actions, Render*
  - Built a production-style recruitment REST API with **FastAPI** and **PostgreSQL**, supporting candidates, recruiters, companies, jobs, and applications.
  - Implemented **JWT authentication**, **bcrypt password hashing**, **RBAC**, **resource ownership**, search, filtering, pagination, and application workflows.
  - Developed **48 automated tests** with pytest and integrated **Docker**, **GitHub Actions CI**, and **Render deployment**.
- **Task Management REST API** Live Demo  
*Tech Stack: Python, FastAPI, PostgreSQL, SQLAlchemy, JWT, pytest, Docker, GitHub Actions*
  - Developed a secure **FastAPI REST API** for user authentication and task management with PostgreSQL and SQLAlchemy.
  - Implemented **JWT authentication**, **password hashing**, **request validation**, **protected endpoints**, and automated API testing with pytest.
  - Containerized the application with **Docker** and configured **GitHub Actions CI/CD** for automated testing and Docker image validation.
- **ECG Arrhythmia Classification System** Live Demo  
*Tech Stack: Python, XGBoost, Node.js, MongoDB, Render*
  - Built a machine learning model using **Python** and **XGBoost** achieving **99% accuracy** in classifying ECG heartbeats into 5 categories (Normal, SVEB, VEB, Fusion, Unknown).
  - Engineered a full-stack prediction system with a **Node.js** backend integrated with the Python ML model, enabling real-time inference via REST API.
  - Designed a web-based interface displaying prediction results with confidence scores, backed by **MongoDB** for storing prediction history.
  - Deployed the application on **Render**, making the tool accessible via a live public demo.

TECHNICAL SKILLS

---

- **Programming Languages:** Python, Java, SQL, JavaScript, TypeScript
- **Backend & APIs:** FastAPI, REST APIs, SQLAlchemy, JWT Authentication, RBAC
- **Web Technologies:** React.js, HTML, CSS, JavaScript, Node.js, Express.js
- **Databases:** PostgreSQL, MySQL, MongoDB, Database Management
- **Testing & DevOps:** pytest, Docker, Git, GitHub, GitHub Actions, CI/CD, Render, Alembic
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Testing & Debugging
